INVITATION TO PARTICIPATE

Dear Madam / Sir,

We are honoured to invite You to the 9th National Conference on Pharmacoeconomics and Healthcare Management, organized at:

6-8th of October 2022, Hotel Piatra Mare, Poiana Brașov (and partial *on-line* attendance)

Prior to the main event, a special preconference lecture will be given, entitled:

Health Technology Assessment workshop: from the basics to the impact of new health technologies on the payment system

Speaker: **Zoltán KALÓ**, Professor of health economics, Semmelweis University of Budapest, Hungary / Syreon Research Institute

The event is organized by the George Emil Palade University of Medicine, Pharmacy, Science, and Technology of Targu Mures, the Center for Health Politics and Management (SURYAM association). The management of the event will be assured by **Health Events (SURYAM SRL / SMARTFARM SRL)**.

Partners of conference: ISPOR Romania (Romanian Pharmacoeconomics Society).

The prestigious event hosts more than 500 invitees including public health policy makers (Health Ministry, National Health Insurance House - NHIH, National Agency for Medicines and Medical devices of Romania - NAMMDR, Members of The Romanian Parliament, National School of Public Health, Management and Professional Development), managers, medical directors, healthcare department directors, teaching staff from the medical universities of Romania, as well as representants of a number of companies.

The invited speakers make the event an important forum for exchanging ideas and experience, yet offers possibility to get in touch with important people from the field.

The conference has two main modules:

Thursday-Friday (6-7th of October): Pharmacoeconomics.

Friday-Saturday (7-8th of October): Healthcare management.

PRELIMINARY AGENDA

<p>Pre-conference lecture:</p> <ul style="list-style-type: none">- Health Technology Assessment workshop: from the basics to the impact of new health technologies on the payment system- The impact of the pandemic on the activity of medical service providers and on the consumption of medicines- Consumption of medicines in Romania: current situation and expectations for the next period- Legislative news in regarding the national health programs- Cost-volume-result contracts in Romania (Managed Entry Agreements)- Claw-back fee: legislative proposals- NHIH (CNAS) – Medicines Directorate: news, statistics- NAMMDR (ANMDM): activity balance, news in 2022- Projects in the area of drug policy: A new financing system?- HTA implementation in Romania: news, ongoing projects, perspectives- Scientific module: health economics, public health, pharmacoepidemiology, health management- European Health Data Space (EHDS): presentation and it's utility for health system, analysts and researchers.	<ul style="list-style-type: none">- The activity of hospitals in 2022 and the perspectives for the future in the current demographic context.- The National Health Strategy: implications for the hospital network in Romania.- Hospital funding rules in 2023: Return to the payment for performance?- The CaPeSSCoST project: the current state of the project, implications for the future- Wage subsidies (influences) between sustainability and cost-efficiency- Co-payment in hospitals: private sector experience, opportunities in the public sector- Hospital infrastructure development and funding sources: PNRR, governmental- and local sources, bank loan?- Quality management in hospitals: clinical standards and audit.- Human resource management in hospitals: between needs, sustainability and availability.- Continuous professional training of the hospital manager and the management team: needs, news in regulation, expectations.- Day hospitalization: developments, news.- Hospital emergency funding rules: a taboo subject? Perspectives and alternatives.- Informal payments in the region: do wage increases solve the problem?- The impact of inflation on hospital costs: solutions to cover the increasing costs

We look forward to your participation in this event. For confirmation, please send an email to secretariat@cnfms.ro.

dr. László Lorenzovici, President CNFMS 2022

FOREWORD

The 9th edition of the National Conference on Pharmacoconomics and Healthcare Management (NCPHM) will be organized again in the classical way (i.e., *on-site*). *On-line* presentations will be held only in special circumstances.

The present edition is proposing a diverse, but nevertheless ambitious programme, offering answers to some of the frequently asked questions generated by the recent challenges that we are facing, including the pandemics, war, economic crisis, hyperinflation...

EU states including those from the ECE region are exposed to external shocks such as the Covid-19 pandemics, the consequences of the war, economic crisis, hyperinflation, migration of health workers, demographic decline ... and health systems have to face all these challenges.

Besides these major challenges, the states from this region have another major problem: their health system is tackling a considerable lack of infrastructure, funds and last but not least, administrative capacity and system management.

Romania - similar to other former socialist states from the East-European block that have become members of the EU – is dealing with the above-mentioned challenges, while its citizens are having ever-evolving expectations towards the decision-makers, healthcare service providers and healthcare professionals.

Although in recent years there has been a considerable surge in the volume of healthcare system financing, a seemingly permanent financing gap exists, with ever-evolving unmet needs. Meanwhile, the efficient resource utilization remained a minor issue, and is regaining its importance in recent times, at a system level.

The objectives of the present edition of the NCPHM are in concordance with the already mentioned challenges that our healthcare system is facing.

Defining itself as a forum for exchanging ideas related to the healthcare system, NCPHM is acting a mediator between the stakeholders of the healthcare system.

The NCHMS aims to contribute to increasing the administrative capacity of the health system by disseminating knowledge through courses, analyses and presentations by experts, to provide the framework for professional and scientific debates in the field of pharmacoconomics and health management.

Furthermore, our objective is also to bring together academics and PhD students in pharmacoconomics, health management and public health.

In order to facilitate the attendance of specialists from public and educational institutions, the NCHMS will offer the possibility of free participation for experts involved in the development and implementation of health policies, thus contributing to their professional development.

We expect you to actively contribute to the presentations and debates of CNFMS 2022.

dr. László Lorenzovici
President CNFMS 2022
